PROFESSIONAL SUMMARY

Web developer with hands-on experience building and maintaining websites using HTML, CSS, Tailwind, JavaScript, TypeScript, Next.js, PHP and MySQL. Comfortable working across the front end and back end, from styling a page to connecting it to a database. Also experienced in graphics design, helping create interfaces that look good and make sense to the people using them.

EMPLOYMENT HISTORY

Web Developer

Binal Technologies

Apr 2025 – 2026

- Build and maintain websites for clients using HTML, CSS, Tailwind, JavaScript, TypeScript, Next.js and PHP, with MySQL for the back end.

Freelance Web Developer & Graphics Designer

Remote

2023 – Till Date

- Built responsive websites for startups, small businesses and individual clients using HTML, CSS, Tailwind and JavaScript, with PHP and MySQL on the back end.
- Worked directly with remote clients from initial concept through design, development and final delivery.
- Built landing pages for early-stage startup clients; designed branding assets, social media graphics and marketing visuals.
- Managed projects independently while communicating with clients and teams across different time zones.

Web Developer / Teacher (Internship)

Digital Dreams ICT Academy, Enugu, Nigeria

Sep 2022 – Feb 2023

- Supported students learning HTML, CSS, PHP and MySQL by explaining concepts and reviewing project work.
- Built small practice websites and exercises used in class to demonstrate front end and back end concepts.

Graphics Designer / Computer Operator

Arizona Computer Center, Enugu, Nigeria

Nov 2019 – Jun 2021

- Designed graphics and handled general computer operations using Photoshop and CorelDraw.
- This is where my interest in building things for the screen started, which later led me into web development.
